

ECON1910 Postponed exam Spring 2025

1. Consider a farmer household whose income depends on its work capacity and where its work capacity depends on its income. Show that two such relationships can lead to a poverty trap.
2. How could irrigation affect the economic situation of the household?
3. How could free health care affect the economic situation of the household?
4. How could access to credit affect the economic situation of the household?
5. How could a farmer community arrange a system for micro credit finance?
6. Should foreign assistance be replaced by micro credit finance?
